Continuation of 3. NOTE: The recitation in claims 1, 10 and 15 that the frame is positioned proximate the vehicle seat so that a person positioned in the seat may use the exercise device raises new issues that would require further consideration and/or search. The recitation in claims 1, 10 and 15 that the passenger compartment includes a steering control for the vehicle raises the issue of new matter because the specification on page 1, lines 6-8, in addition to indicating that both driver and passenger seats are ideal locations, indicates that the invention is positionable and may be used anywhere in a vehicle. There is no antecedent basis for the limitation that the passenger compartment includes a steering control for the vehicle.

Continuation of 11. does NOT place the application in condition for allowance because: the amendments raise the issues that would require further consideration and the isse of new matter.
